

LCi Multifold Interfolder

Our LCI Manual Multifold Interfolders are designed for high-speed, efficient production of hand towels. Perfect for the smaller converter or for entering new markets, these machines are built with the same quality and durability you have come to expect from Bretting.

Available in widths up to 69" (1.75 m), these compact machines require minimal labor and floor space. Automatic separator upgrades and interfold heads for jumbo multifold, 4-panel, 5-panel and 6-panel are available.

Some photos shown without guards. Guards are provided and need to be in place before operation.

Features:

- Compact modular design
- Simple and reliable technology
- Engineered for floor level operation
- Plug & Produce platform for fast installation
- High-speed production with exceptional product quality
- Sectionalized independent electronic drive system
- Ability to run diverse substrates
- CE Compliant design
