

Bretting Bulk Pack Polywrapper

Reliable and versatile wrappers

The fully automatic bulk pack wrappers are some of the most reliable and versatile wrappers available today. Innovative sequential servo motor technology and rapid, easy size changeovers are part of their thoughtful design to achieve top performance in packaging bulk pack napkins using low gauge printed polyethylene or polypropylene packaging material.

The servo motors provide continual and constant positive control of the product and the wrapping material. They also minimize the utilization of mechanical wearing parts and increase machine changeover capability.

Standard Features:

- Automatic Infeed Unit
