

LCi Napkin Folders

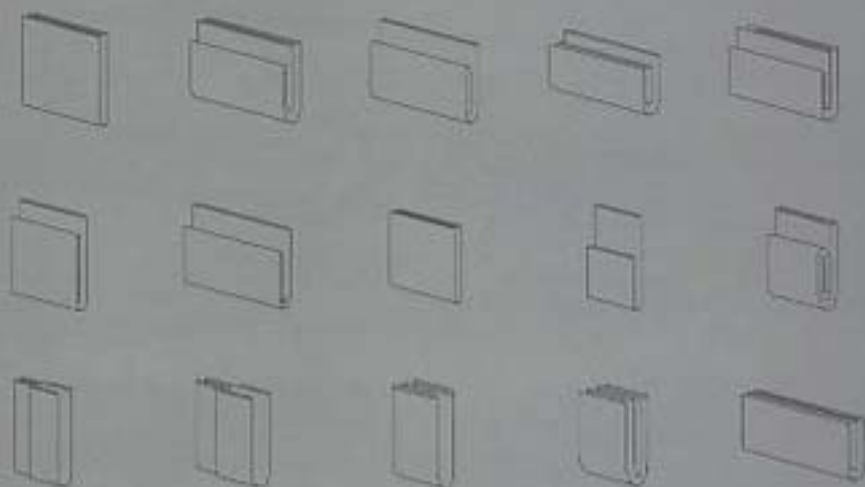

Our Bretting LCI Series of Napkin Folders is the answer to a dynamic and demanding marketplace. These folders are capable of converting both 1/4 fold and double transverse (1/8 fold) in multiple package count configurations. The LCI is available in 2 and 4-lane versions.

Some photos shown without guards. Guards are provided and need to be in place before operation.

Features:

- High-speed production with exceptional product quality
- Flexible, compact modular design
- Engineered for floor-level operation
- Plug & Produce platform for fast installation
- Simple, reliable technology
- Able to run diverse substrates
- Independent electronic drive system for each component
- CE Compliant design
