Hygienic Tissue Rewinder

Our Hygienic Tissue Rewinder line covers all operations from unwind stand through log saws. The Rewinder is a three roll surface winder for the production of bath tissue between 4" diameter and 6" diameter. Automated controls allow a wide range of products to be produced with minimal changeover time. Web widths available from 89" to 142" (2.25 m - 3.5 m).

Features:
* Modular design enhances future flexibility
* Plug & Produce platform for fast installation
* High-speed production with exceptional product quality
* Sectionalized independent electronic drive system

Standard Components:
1. Self-Chatking Core-Ejecting Unwind Stand (one stand)
   - Core-reverse system for fast roll changes
   - Automatic web tension control
   - Sheets with optional unwind configuration
2. Embossing
   - Roller-to-Steel
   - Wedge-type nip adjustment
3. Three-Roll Surface Rewinding Head
   - Three-web speed range: 1800 - 2200 - 2600 feet per minute
   - Adjustable length perforation system
4. Tail Sealer
   - Adjustable position of guided tail location in accumulator
   - Adjustable tail height
5. Orbital Log Saw
   - Programmable cut length
   - Tight wound system
   - Quick-change tempered blade mounting

Optional Equipment:
- Unwind Stands (multiple stands)
  - Models available for up to 2.75 meter roll diameter
- Auto-Splice Unit
  - Splices web on the fly at reduced speeds
  - Both mechanical splice-bonding or tape-splice available
- Emboss Unit
  - Collection emboss configurations
- Calendering Units
  - Open and closed nip
- Lamination / Coating
  - Coating Units
  - Point-to-Point
  - Hot
  - Enclosed cavity or fountain roll glue systems
- Log Accumulator
  - 2000 net log capacity
  - Independent input and discharge devices
  - Transfer to single or dual stacks
- Log Saw
  - Optional configuration for higher output requirements
- Core Carts

C.G. Bretting Manufacturing Co., Inc.
