

# OEM Solutions

The Alternative Source For Your OEM Replacement Parts  
Paper Converting Industry

VOLUME 1, ISSUE 2

## We can help!

OEM Solutions gives our core customers an alternative for non-Bretting equipment replacement parts that meet or exceed their original specifications in form, fit, and function. What began as a collaborative effort with two mills, has flourished into 52 mills worldwide and still growing.

### The Team

Tom McMullen, our OEM sales manager, travels the country visiting warehouses and storerooms. He will gladly go through inventory lists, part numbers, take measurements, and gather samples. Samples are sent to our COP team back at the corporate office. Select members from COP, engineering, and the machine shop get involved to model, price, catalogue, and manufacture your parts. Questions can be directed to Tom McMullen or any member of the COP team.

**The end result – quality parts and reliable delivery for our customers.**

### Bretting Manufacturing

- Committed to quality
- Delivering results on-time
- Using the latest technology
- Supplying affordable, quality parts for any machinery
- Focus on total value solutions

### Catalog

Our on-line catalog contains over 600 parts with solid models and detailed prints.

Parts are cross-referenced so customers can order parts for non-Bretting equipment as effortlessly as standard Bretting parts.

For access to the catalog, email [Tom McMullen](mailto:Tom McMullen) today!
